

Ms. Paula Rarden
Customer Service Department
Frankfort Electric & Water Plant Board
315 West Second Street
Frankfort, KY 40601

Dear Ms. Rarden:

_____ of _____
(Applicant) (Address)

Frankfort, Kentucky has requested that the Frankfort Sewer Department approve the installation of a separate agricultural water meter and establishment of a separate account for consumptive water uses such as irrigation and lawn sprinkling. This account would be exempt from wastewater charges based on the information that more than 20 percent of the water from this meter will not enter the wastewater collection system. Wastewater service charges will continue unchanged on the original meter.

The Frankfort Sewer Department will perform inspections of this service to verify compliance with requirements. The Frankfort Sewer Department reserves the right to discontinue this arrangement and begin wastewater service charges in the event that water from the agricultural meter enters the wastewater collection system or any sewer use requirements are violated. The applicant has signed this document and agrees to all conditions of ordinance number 13.04.070, "Charges Where Twenty Percent or More of Water Does Not Enter Sewer" as outlined above.
